

PROFESSIONAL SUMMARY

Python Backend Developer with hands-on experience in designing, developing, and deploying Django-based web applications. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, REST APIs, and database management. Familiar with AWS cloud services and collaborative Git-based workflows. Actively seeking a Python Backend / Software Developer Intern role to contribute to scalable backend systems.

EDUCATION

Kongunadu College of Engineering and Technology

Trichy, India | 2021 - 2025

Bachelor of Engineering - Electronics and Communication Engineering

PROFESSIONAL EXPERIENCE

MahilMart Shopping Website | www.mahilmart.com

- Designed and developed a scalable full-stack e-commerce web application using Python, Django, and MVC architecture, ensuring clean separation of concerns and maintainable backend code.
- Implemented secure Authentication and Authorization for users and admins using Django auth, including role-based access control, session management, and password encryption.
- Built core e-commerce features such as product catalog, shopping cart, order management, and checkout workflows, efficiently supporting 1000+ products.
- Developed RESTful APIs using Django ORM to perform CRUD operations, handle JSON requests/responses, and integrate frontend with backend services.
- Deployed the application on AWS EC2, ensuring high availability, scalability, and production-ready performance with minimal downtime.
- Integrated AWS S3 for secure storage and retrieval of 1000+ product and media images, improving load performance and achieving 99.9% uptime.

- **Tech Stack :**

- **Backend :** Python, Django.
- **Frontend :** HTML, CSS, JavaScript.
- **Database :** MySQL, MongoDB.
- **Cloud** : AWS (EC2, S3, RDS)

Hotel Booking System

- Designed and developed a full-stack Hotel Booking System using Python and Django, following MVC architecture for scalable and maintainable application design.
- Implemented real-time room availability and reservation management to prevent double bookings and ensure data consistency.

- Developed RESTful APIs using Django ORM to manage reservations, customer profiles, and availability updates with JSON-based data exchange.
- Integrated PostgreSQL for efficient relational data management, optimized queries, and reliable transactional booking operations.

- **Tech Stack:**

- **Backend** : Python, Django.
- **Frontend** : HTML, CSS, JavaScript.
- **Database** : PostgreSQL

Supermarket Management System

Tech Stack: Python, MySQL, OOP

- Developed a console-based billing and inventory management system using Python and MySQL, implementing CRUD operations to manage 200+ products and 50+ customer records.
- Applied Object-Oriented Programming (OOP) principles and implemented custom sorting logic for price-based product listing and optimized inventory updates.

Library Management System

Tech Stack: Python, OOP

- Built a Python-based library management system implementing CRUD operations to manage 500+ books and student borrow/return transactions.
- Designed modular and reusable class structures using OOP concepts to improve maintainability and scalability.

TECHNICAL SKILLS

- **Programming & Back-End Development:** Python, Django, RESTful APIs, ORM, Authentication & Authorization
- **Data Analysis & Visualization** : NumPy, Pandas, Power BI.
- **Front-End Development:** HTML, CSS, Javascript.
- **Database Management:** MySQL, PostgreSQL, MongoDB.
- **Version Control** : Git & GitHub.
- **AWS Cloud Platforms:** S3 Bucket, EC2, RDS.
- **Tools Used** : Pycharm, Vs Code, Jupiter Notebook, Dbeaver, PgAdmin.
